The Faculties, for intellectual abilities, moral worth and professional acquirements, will compare favorably with the most distinguished in our country. The medical faculty constitutes an anomaly in this or any other country—all of them are able lecturers and the best of teachers. Those who will contemplate our geographical position, and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to icalth, including all seasons of the year, we deny that ANY OTHER CITY HAS MORE.

The first class of the Law and Medical Departments of this Institute were small, but the gentlemen composing them are talented and in the highest degree respectable—a favorable omen for the future prosperity of the Institute.

That the public may be satisfied of the permanency of this school, we feel it our duty to state, that the Trustees and Faculty form a UNIT in action, which augurs well for its future success; and that the peculiar internal organization which connects them, cannot be interrupted.
